
Join Our Team as a Biologist or Biochemist (m/f/d) for Protein Purification

Are you ready for an exciting scientific adventure? At Cube Biotech, we're seeking a skilled biologist or biochemist with a strong passion for protein purification to join our exceptional team. Located in the heart of Monheim, situated between the dynamic cities of Cologne and Düsseldorf, Cube Biotech is not just a workplace – it's a hub of innovation and discovery.

Who We Are: Cube Biotech is a global biotechnology company that partners with the pharmaceutical industry and is specialised in membrane protein purification and stabilisation. We're not just about business; we're committed to advancing science and creating solutions for customer needs. As both a service provider and a manufacturer of high-quality products for protein purification and stabilization, we empower university laboratories, research-based pharmaceutical companies, and pioneering biotech firms.

Our team at Cube Biotech is more than just colleagues; we're a close-knit group of professionals. With 40 dedicated members, we value qualities like communication, openness, and flexibility. In return, we offer you an intriguing and diverse role within a rapidly growing company. Your work here won't just impact your career; it'll contribute to meaningful scientific advancements.

Your Mission: As a biologist or biochemist specializing in protein purification at Cube Biotech, you'll take on exciting challenges and push the boundaries of science. Your responsibilities will include:

- The work on complex service projects for pharmaceutical and biotechnology clients.
- Crafting innovative purification strategies, particularly for membrane proteins, supported by thorough literature research.
- Utilizing cutting-edge technologies like nanodiscs and synthetic co-polymers for membrane protein stabilization.
- Spearheading method development to achieve scientific excellence.
- Creating comprehensive project reports and presentations to showcase your remarkable achievements.

- Collaborating in the organization of laboratory procedures, fostering a culture of continuous improvement and open communication.

Your Profile: To excel in this role, you'll bring a unique blend of skills and qualities:

- A degree in biology (PhD.) or related fields.
- Profound practical and theoretical expertise in protein purification is essential.
- Hands-on experience with membrane proteins, demonstrating your expertise.
- A solid background in biophysical protein characterization to strengthen your profile.
- Exceptional organizational skills, flexibility, open communication, reliability, and a team-oriented mindset.
- Strong proficiency in spoken and written English.
- Proficiency in MS-Office, especially Excel, and excellent computer skills.

What We Offer: Joining Cube Biotech means an opportunity to grow both personally and professionally. We provide:

- Comprehensive initial training to help you succeed.
- Engaging and meaningful work that fuels your passion for science.
- A fast paced environment with the opportunity to learn and excel in the leading technologies of membrane protein purification.
- A full-time position with regular hours (Monday to Friday), initially limited to two years in a forward-thinking market.
- Collaboration within a motivated team that values quick decision-making, flat hierarchies, and open communication.
- Convenient free parking right at our doorstep, canteen subsidies, company branded merch, bike leasing, company events and complimentary beverages to keep you refreshed.
